

ZEOCHEM®

PURMOL®

Molecular sieve powder and paste
The new standard packaging

The new PURMOL® bags are packed on a top modern, high capacity robot line just in time

① Bags are packed and sealed fully automatically.

② During transportation, each bag is printed in-line on both sides with package date (month/year) net weight, product type and batch number.

③ The robot is placing the bags precisely on to the CP2 pallet.

④ 24 bags per pallet are secured with a strong PE stretch film.

The packed pallet is wrapped with a strong PE stretch film for an optimal shipment and additional protection against moisture during transportation and storage.
